Protect the Tuolumne River!

A Petition to the SFPUC

We, the undersigned, oppose the diversion of any more water from the Tuolumne River. More than half of the Tuolumne is already diverted for agricultural and urban uses, resulting in a dramatic decline in Chinook salmon, steelhead trout and other sensitive species. With the future of the Sierra snowpack uncertain due to global warming, it is in our interest to minimize our dependence on the Tuolumne. We encourage the SFPUC and its wholesale customers to prioritize water conservation, efficiency and recycling.
